

Sprint Planning Package — Sprint 5

Introduction

The overall goal for this sprint is finishing the code, and prototype and starting the report. A lot has been done last sprint. The issue of everyone getting their fair chance at code has been largely addressed. However, Karlos's part of the code is not done yet so we will impress on him and assist him to get it done this sprint.

Sprint Duration

- May 7th, 2024, to May 21st, 2024.

Sprint Goals

- **Complete code.**
- **Have a running prototype** ready for presentation.
- **Begin report writing.**

Team Capacity

- **Available Hours:** Our available time for this sprint is likely less than usual, due to the pending math exam and being significantly behind in the SE course.
- **Team:** M, A, S, K

Expectations

- MVP: Completing the code, as in minimum viable product.
- Prototype: Having a fully running prototype.

Risk Mitigation

- Making sure anyone left behind with respect to code is duly assisted to do their part.
 - Everyone understanding the entire code structure.

Sprint 5 planned Review and Retrospective

- On May 21st, 2024.

Prep for Sprint Planning

- Focus on documenting our efforts on Jira.
- Ensuring that the tasks get delegated and setting a feasible deadline. And that said person has the skill to do the task or acquire the skills within the required time.
