Sprints & Jira

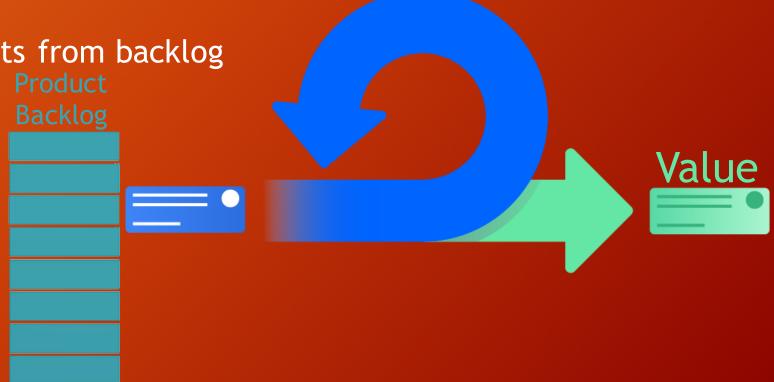

A software development management tool

Scrum is all about sprints

Product owner has Backlog ready

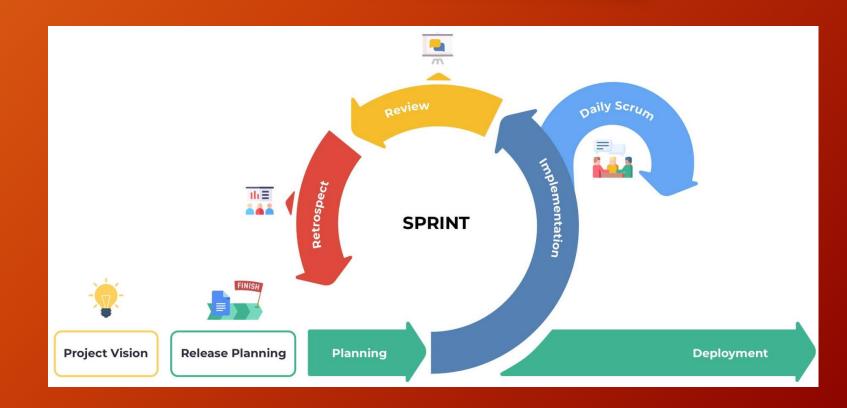

Scrum Team create sprints from backlog

• Sprints end with value

Phases of a Scrum Sprint

- 1. Sprint Planning
- 2. Daily Scrum
- 3. Sprint Review
- 4. Sprint Retrospective

Sprint Planning

- Determine a goal of the sprint
- Load sprint with stories to reach goal
- Make sure stories match your "definition of ready"

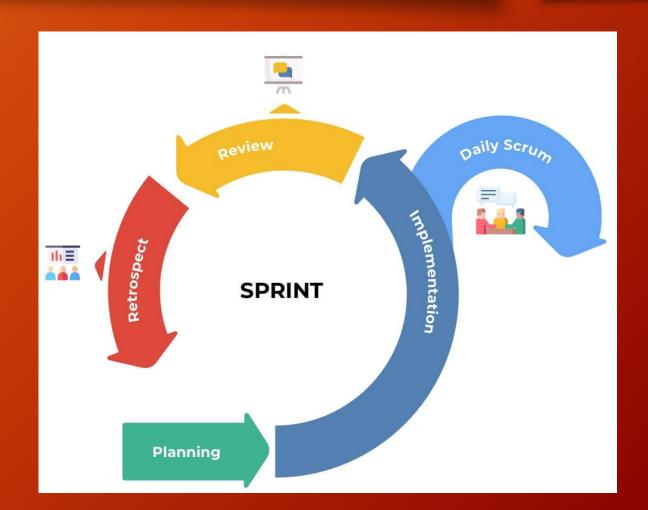

If these words do not make sense right now

Don't worry, you will learn them in GSE:)

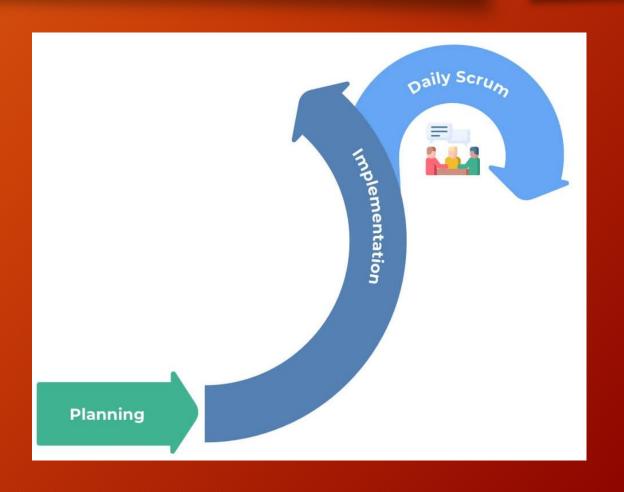

Phases of a Scrum Sprint

- 1. Sprint Planning
 - Sprint Goal
 - Stories allocated to sprint
- 2. Daily Scrum
- 3. Sprint Review
- 4. Sprint Retrospective

Daily Scrum

- Meeting with scrum team devs
- Identify impediments
- Evaluate progress
- Decision making

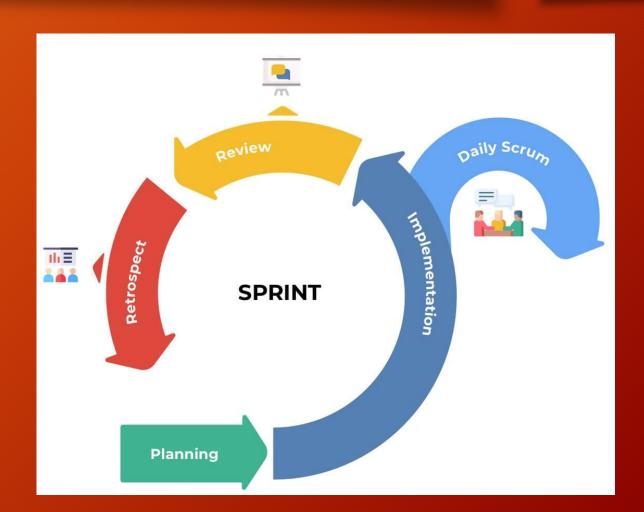

Phases of a Scrum Sprint

1. Sprint Planning

- Sprint Goal
- Stories allocated to sprint

2. Daily Scrum

- Show progress
- Identify impediments
- 3. Sprint Review
- 4. Sprint Retrospective

Sprint Review

- Focus on the product
 - Technically with Product Owner and stake holders
- Go through completed stories of the sprint
- Inspect backlog and future sprint goal
- Evaluate velocity and sprint flow

Phases of a Scrum Sprint

1. Sprint Planning

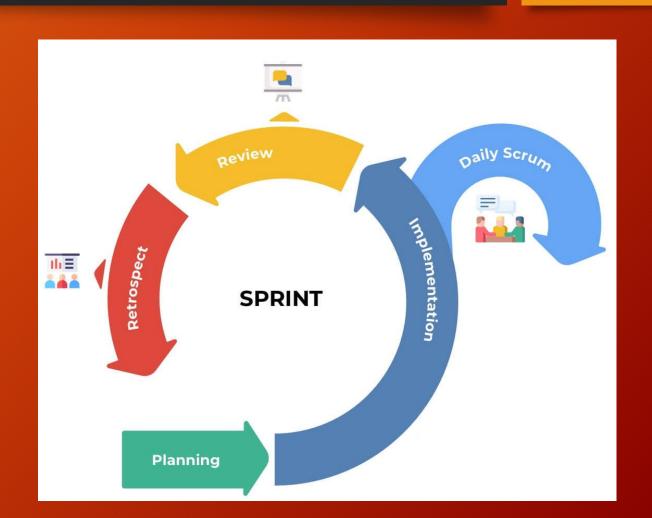

- Sprint Goal
- Stories allocated to sprint

2. Daily Scrum

- Show progress
- Identify impediments

3. Sprint Review

- What has been done?
- What to do next?
- 4. Sprint Retrospective

Sprint Retrospective

- Focus on the process
 - Only with Devs
- In technical detail
- Asses quality of collaboration
 - 1. What went well?
 - 2. What didn't go well?
 - 3. What could have been done better?
 - 4. What have you learned?
- Reconfigure "Definition of Done"

Phases of a Scrum Sprint

1. Sprint Planning

- Sprint Goal
- Stories allocated to sprint

2. Daily Scrum

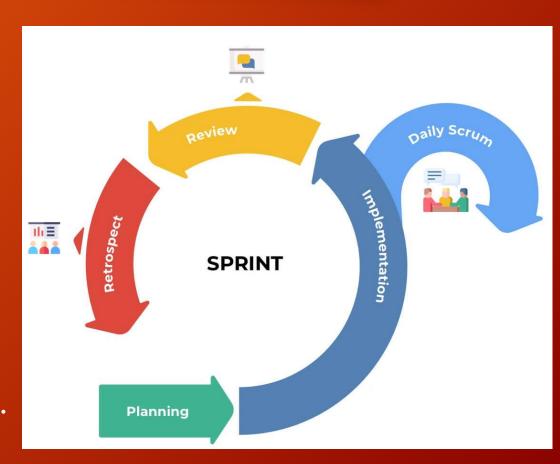

- Show progress
- Identify impediments

3. Sprint Review

- What has been done?
- What to do next?

4. Sprint Retrospective

- Evaluate Processes, Communications, DoD, etc.
- Improve developer efficiency

Confused about DoD and DoR?

https://www.scrum.org/resources/blog/walking-through-definition-ready

If User stories are ready for a sprint → Definition of Ready

Is it estimated with story points?

Does it have tasks?

Does it contain a specific user?

Does it fit the connextra template?

If User stories are done after a sprint → Definition of Done

https://www.leadingagile.com/2017/02/definition-of-done/

Have the tests been reviewed and passed?
Has the code has been reviewed?
Does the code base comply with compliance?
Are Acceptance criteria met?

Jira is not just Jira

https://www.atlassian.com/software

Powerful products for every team

Plan, track, and support

Plan, track, and release world-class software with the #1 software development tool used by agile teams.

Learn more

Jira Work Management

Friendly and intuitive collaboration for business teams and their projects, built for cross-team coordination and breaking down silos.

Learn more

Jira Service Management

Collaborate at high-velocity, respond to business changes and deliver great customer and employee service experiences fast.

Learn more

Opsgenie

Notify the right people at the right time with powerful incident alerting and on-call schedules

Learn more

Jira Align

Connect business and technology teams to align strategy with outcomes at enterprise scale.

Learn more

Bring customer needs into focus, set product priorities as a team, and seamlessly move from product ideation to customer delivery, all in Jira.

Learn more

Statuspage

Incidents happen. Keep your users informed and ditch the flood of support emails during downtime.

Learn more

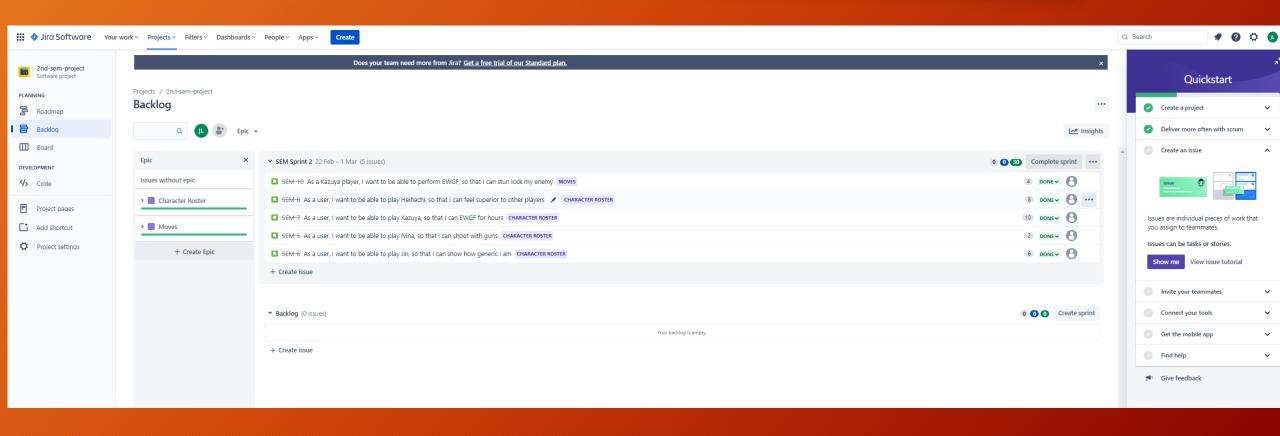

Halp

Capture, track, and report on requests with a lightweight help desk built for Slack and Microsoft Teams users.

> More options

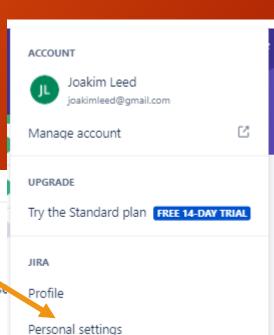

Create Back

Task 1: A new beginning

- Find your Semester project group members
- Create a Jira account (If SDU hasn't granted you one)
- Create a single project in each group
- Invite all of your group members

Personal settings

Log out

Jira labs

Labs features let us experiment with new ideas and get real-world feedback to improve on them. They are works in progress, so break, or may not end up released at all.

Light and dark themes

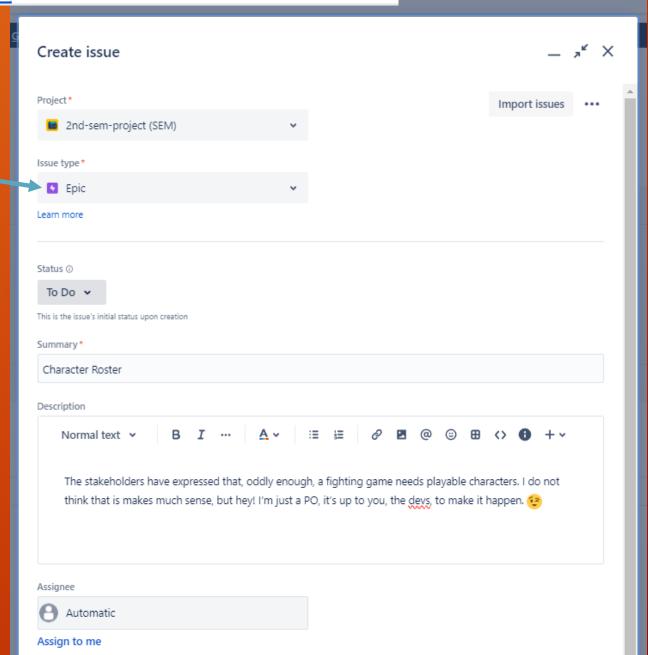

Opt in to try light and dark themes in Jira. Once enabled, you'll get a theme preference selector in **Per** which you can use to switch between themes. You can also set your theme to match your system settings. There are a few areas of Jira that aren't compatible with the new themes yet. Learn more about what we're still working on.

Adding epics

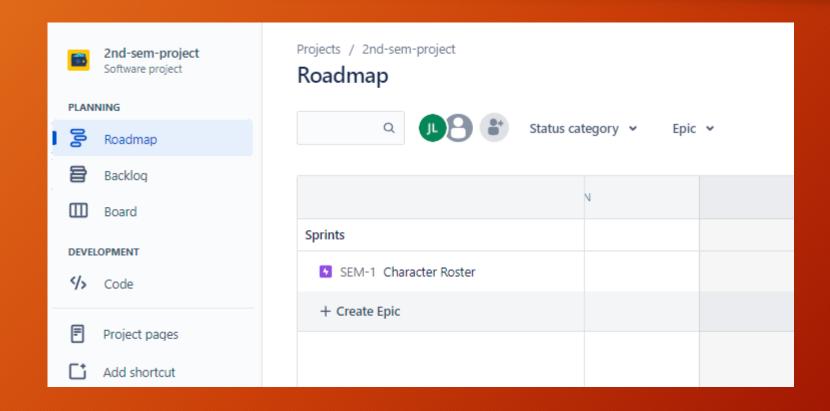

- Let's make an Epic
- Find it on our road maps
- Make User Stories and attach them to it

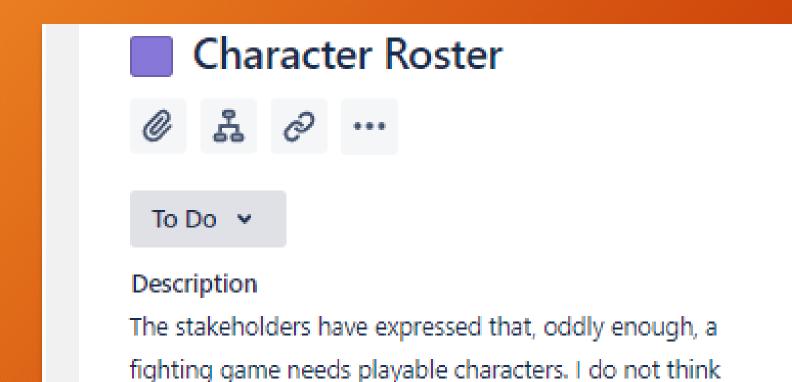

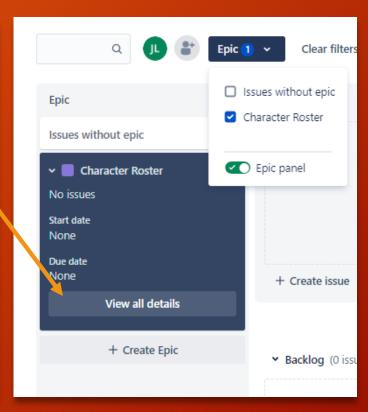

All elements of Jira are called "Issues" __

It's now in our roadmap!

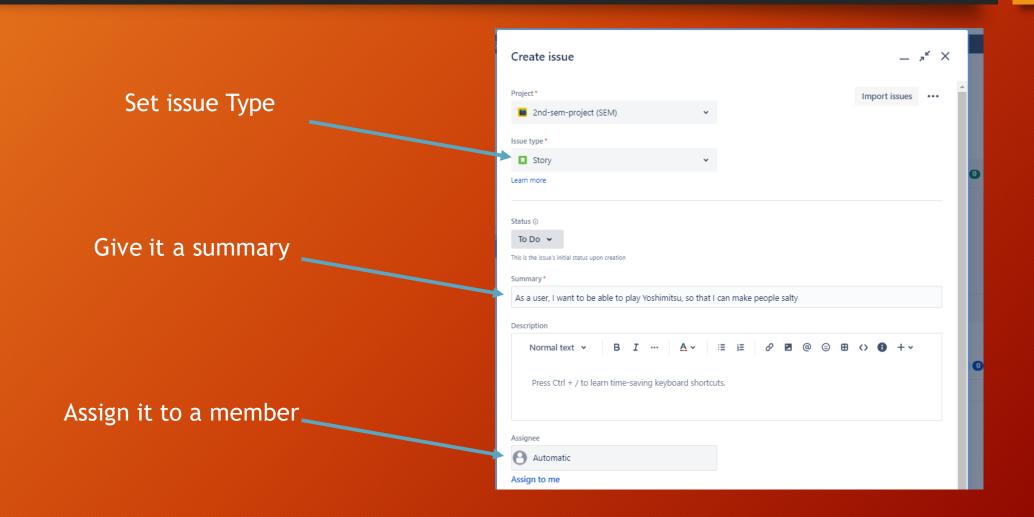

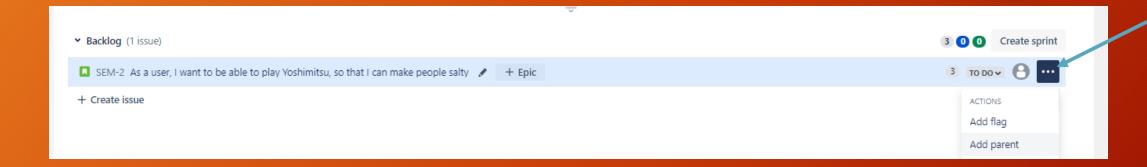

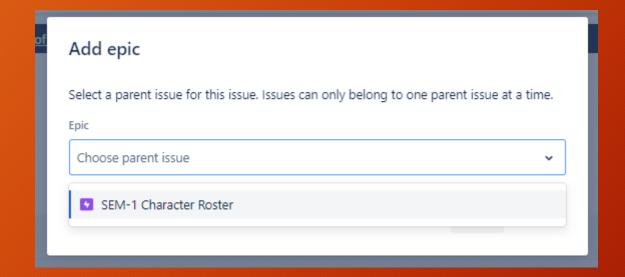

We can toggle visibility

Let's add an User story

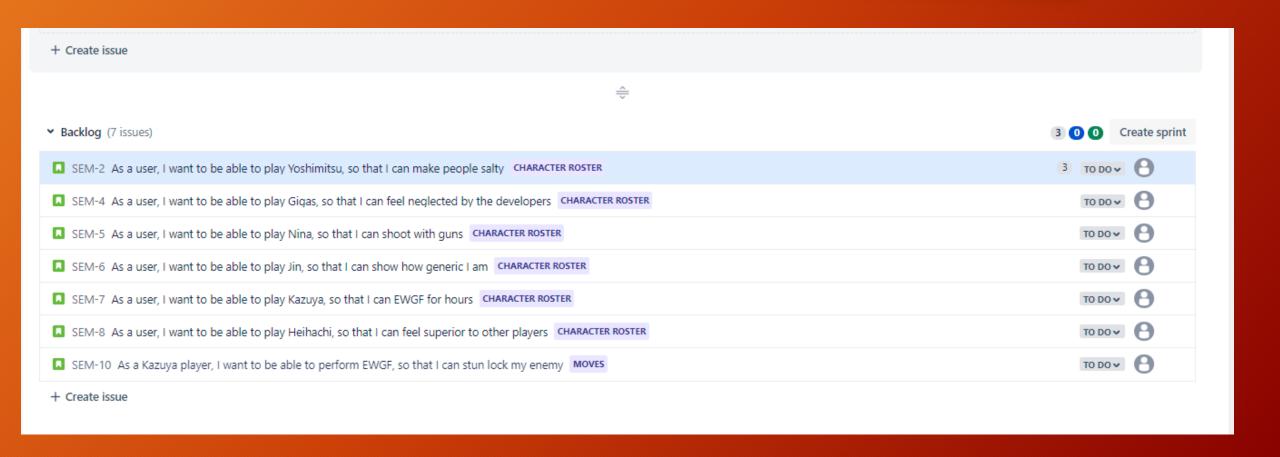

Let's attach it to our Epic!

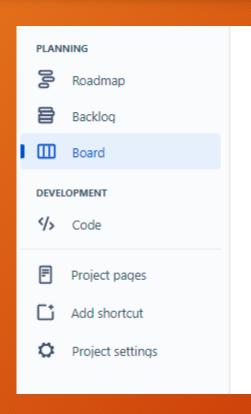

Perfect! Now our Backlog has plenty of stories

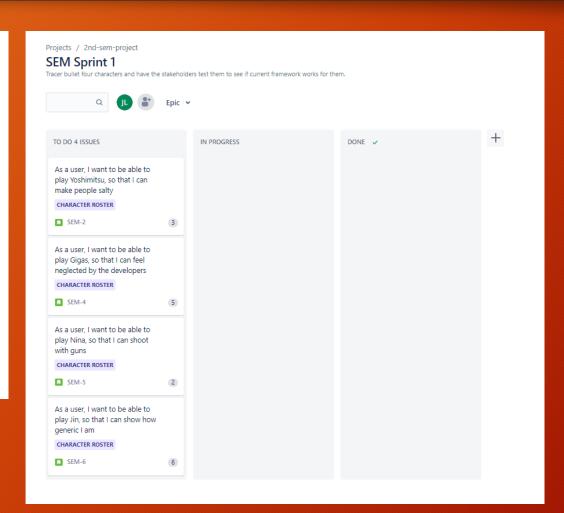

Task 2: Create a back log!

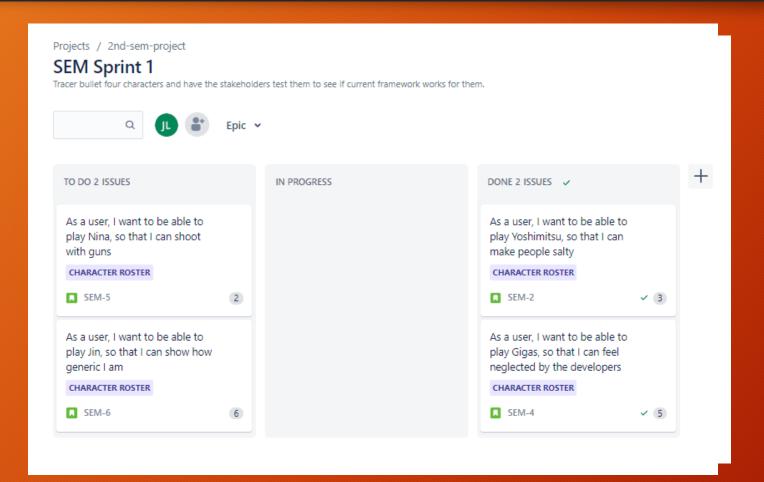

- Create an Epic of some random topic
- Create seven user stories
- Attach them to an epic
- Have Jira display the stories of the epic in the Back Log

Let's make a sprint!

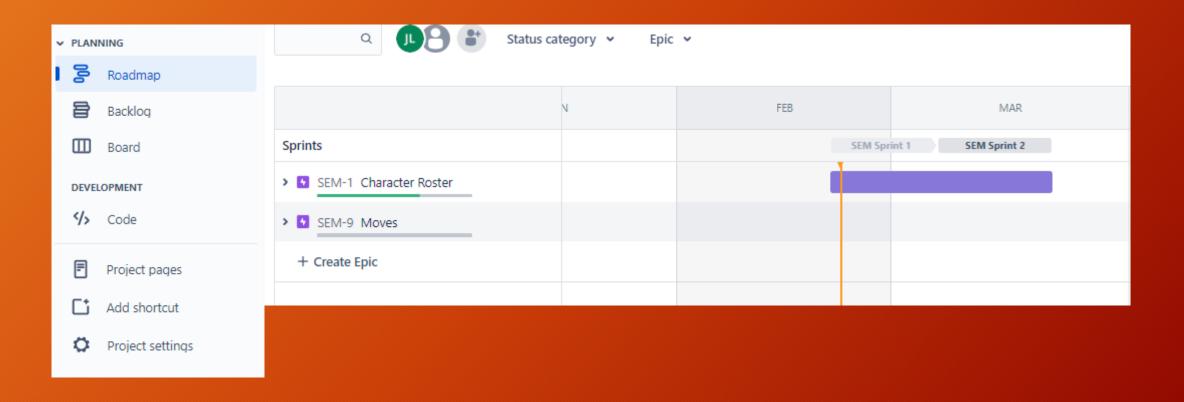

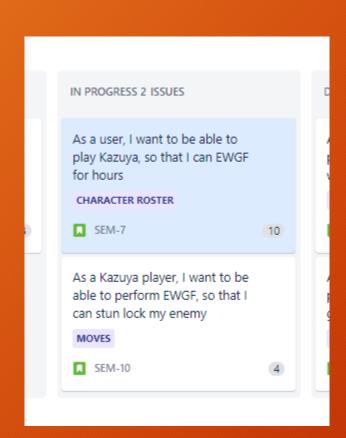

Progress is being made

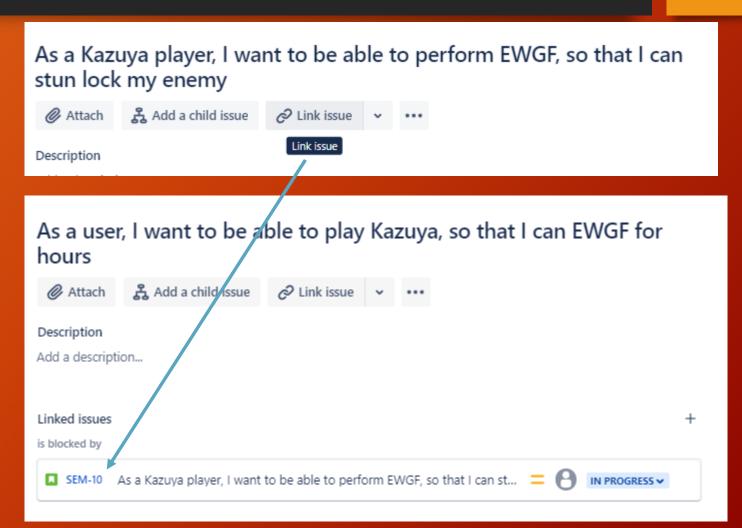

Road map tracks progress

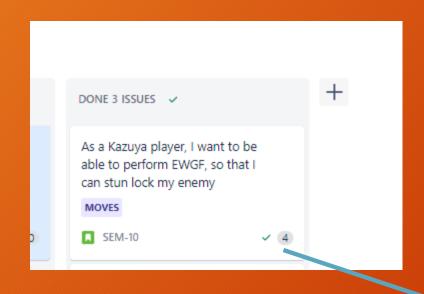

Oh no! we are getting hindered!

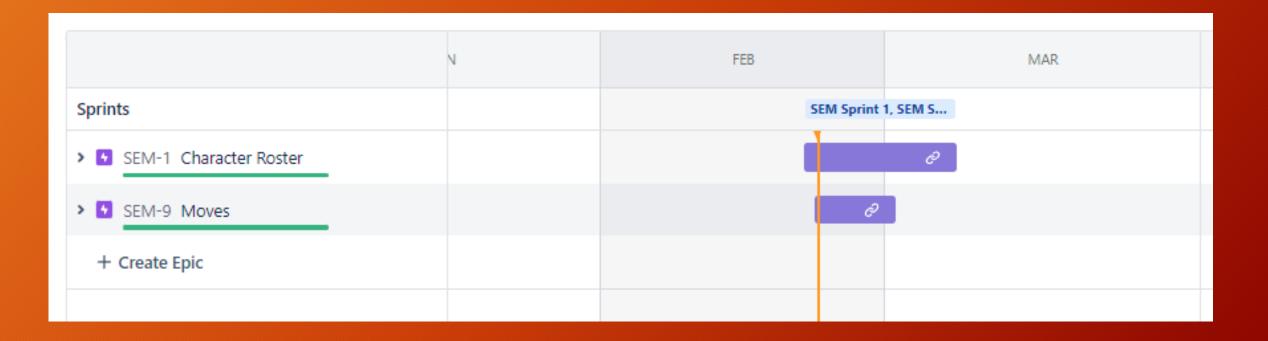

Impediments are tracked by Jira

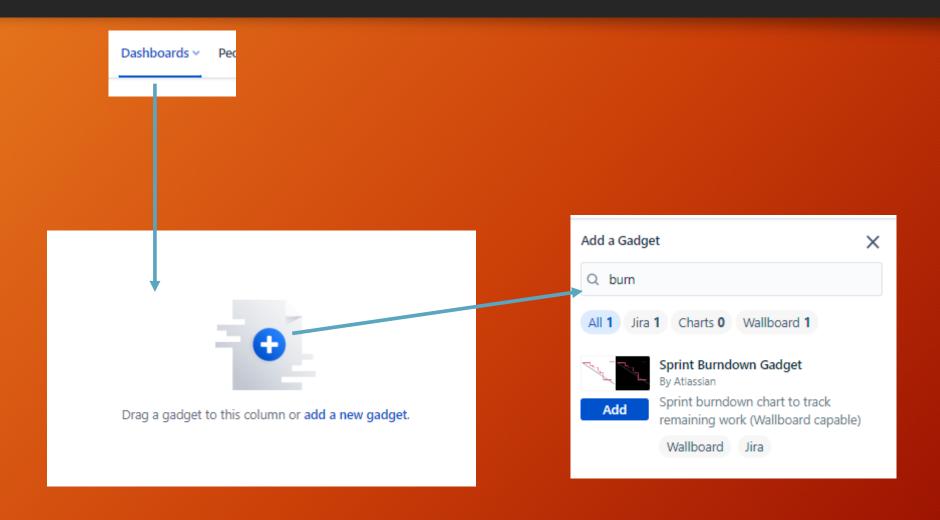

The sprint is done

Time to add some statistics

Task 3: Sprint and Insights

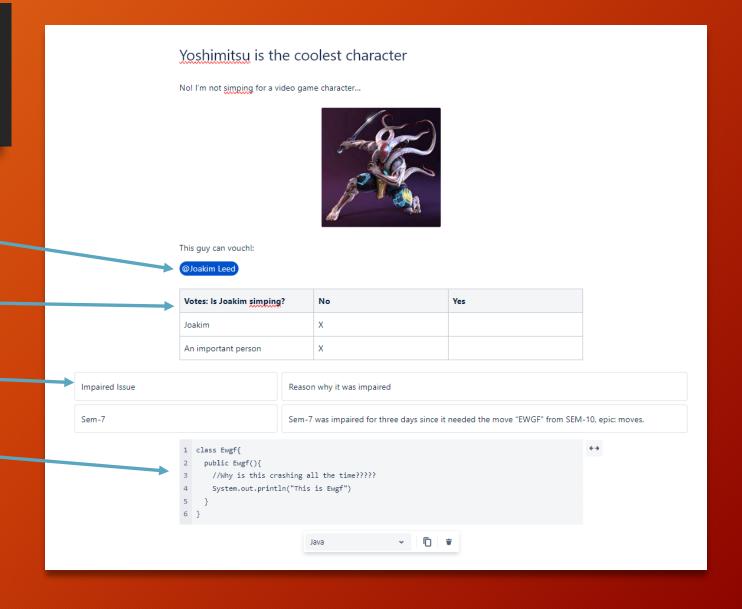

- Add stories to a sprint
- Start the sprint
- Link two stories with an impediment
- Finish the sprint
- Create a burndown chart of the sprint

Confluence: Document integration tool

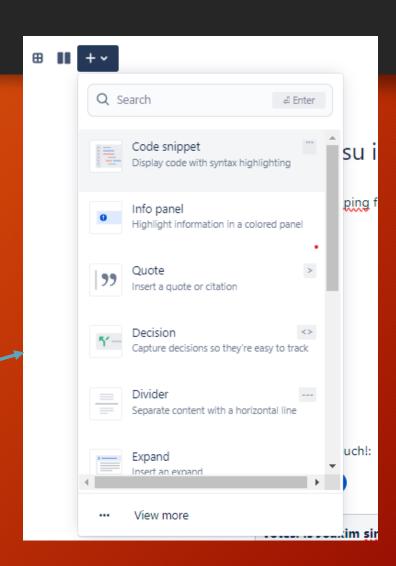

Features

- Mentions of group members —
- Tables ————
- Layouts ——
- Code snippets —
- And lots of extensions
